POSSIBLE FLIM FLAM SITE NO 2

ULAN-UDE, USSR

25X1D

[redacted] photography [redacted] reveals a possible FLIM FLAM site 3.5 nautical miles east of Ulan-Ude, at 51-51N 107-41E (see map).

LOCATION OF POSSIBLE FLIM FLAM SITE.

[redacted] DF reports support the location of FLIM FLAM Site No 2 in the Ulan-Ude area. The site, situated in the narrow Uda River valley, is served by road from Ulan-Ude. Certain details of the site are obscured by a heavy snowfall and by the small scale of the photography.

25X1

The site consists of a large circular area and a smaller circular area, both active, resembling in configuration and size the interferometer and small circular instrumentation pad normally found at FLIM FLAM sites. The site also has a nearby support area approximating in size the support areas at

known FLIM FLAM sites. The small scale of the photography precludes identification of communications antennas, which are normally found at FLIM FLAM sites.
